### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows: In claim 1, line 4, "**said bypath pass**" has been changed to **--said bypass path--**.

2. The following is an examiner's statement of reasons for allowance: Applicant has amended independent claims 3 and 6 to include allowable features indicated in the previous Office Action; amended independent claim 15 to overcome 35 USC 112 issue indicated in the previous Office Action; and amended independent claims 1, 9 and 12 to overcome 35 USC 102 rejections presented in the previous Office Action. Specifically, none of the prior art teaches or fairly suggests the following limitations:

- *Said bypass path and said control means configured such that the amount of current supplied to said differential circuit is reduced in a case where said switching means closes said bypass path to cause current to flow through said bypass path as recited in claims 1, 9 and 12.*
- *Said switching means has a current switching transistor, said transistor having an emitter connected to a common emitter of said differential circuit, and said control means is connected to a connection point between the emitter of said current*

*switching transistor and the common emitter of said differential circuit as recited in claim 3.*

- *Said control means adjusts the current so that the amount of current supplied to said differential circuit when the signal level of the clock signal is at a low level is larger than the amount of current supplied to said differential circuit when the signal level of the clock signal is at a high level as recited in claim 6. And,*
- *Said switching means has a current switching transistor, said current switching transistor having an emitter connected to a common emitter of said differential circuit, and said control means is connected to a connection point between the emitter of said current switching transistor and the common emitter of said differential circuit as recited in claim 15.*

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to An T. Luu whose telephone number is 571-272-1746. The examiner can normally be reached on Monday to Friday from 7:30-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Drew Richards can be reached at 571-272-1736. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
